Rogelio Sandoval | Angular Developer

L: TX | P: (210) 540-6838 | E: rogelio.g.sandoval96@gmail.com

Summary

- 3 years of experience in Analysis, Design, Development, and Implementation of front-end web applications and managing client's Server applications.
- Excellent knowledge in the development of User Experience web and mobile-based applications.
- Experience in building Single Page Applications (SPA) using Model View Controller (MVC) and various JavaScript frameworks such as AngularJs/Angular 2.0/4.0/5.0.
- Used JQuery to develop user interface widgets.
- Experienced in developing event-driven applications using AJAX, JSON, and XML.
- Detailed understanding of the Document Object Model (DOM) and DOM functions.
- Extensively worked with AngularJS Controllers, Filters, Validations, Factory, and Service and created Custom directives to interact with the RESTful Services.
- Good understanding of Selectors, Events, AJAX, and Dom manipulation using components in Angular 2 for updating content on DOM nodes
- Good understanding of ES6 (ES2015) and other language features in the upcoming editions of the ECMAScript specification.
- Involved in Bootstrap framework to Design single-page applications.
- Involved in writing the front-end code for the application using Angular 2.0, Angular 4.0, and Angular 5.0
- Expert in creating Templates, Mockups and Prototypes, Web Interfaces, Layouts, and Flow of future pages.
- Worked on web applications that required cross-browser compatibilities like Chrome, Safari, Firefox, Internet Explorer, and Opera.
- Experience working in AGILE based development environment and participating in Scrum sessions
- Committed to staying up-to-date with the latest design trends and technologies.

Skills

- Angular
- HTML
- CSS
- JavaScript
- jQuery
- AJAX
- JSON
- SCSS
- Bootstrap
- TypeScript
- C#
- Tailwind
- Svelte
- Firebase
- Adobe Photoshop
- SQL
- MySQL
- GitHub
- Jira
- Agile
- Scrum
- SDLC

Education

International Business/ International Studies **Feb 2019 – Jan 2021**

San Antonio College

Full Stack Web Development, Bootcamp **Mar 2019 – Sep 2019**

Experience

SumatoSoft, Remote **Jun 2022 - Current**

Role: Angular Developer

- Involved in developing the UI, layout, and front-end programming for web applications using HTML5, CSS3, JavaScript, jQuery, Ajax, JSON, Angular 2.0/ 4.0/5.0, and Bootstrap.
- Adoption of new principles such as responsive design, mobile-first, and adaptive design using Angular5 libraries using Typescript.
- Developed SPA (single page application) project using Angular 2.0/4.0/5.0 and Typescript for frontend.

- Designed and coded customized Angular 5 services to interact with the backend API and serve components.
- Worked with Angular 4 forms, modules, DOM, events, expressions, controllers, filters, and HTTP requests.
- Used HTTP Request to read data from web servers and process JSON data to render in the UI.
- Connect Web API to Angular using Http Call and design GET, POST, PUT, and DELETE for Web API.
- Fetching JSON data from the Web API, appropriately parsing that data, and rendering it on the screen using various data visualization components.
- Handled response data from RESTFUL web services using XML, JSON, and JQuery to update UI Interacted with java controllers (JQuery, Ajax, and JSON to write/read data from back-end systems).
- Implemented Data Access Layer using Entity Framework with Web API to connect, retrieve and update the data from SQL Server
- Developed Object Oriented JavaScript code and was responsible for client-side validations using jQuery functions.
- Developed source code to consume JSON response received through AJAX calls using jQuery.
- Coding, and testing of reusable JavaScript, CSS3, and HTML5 widgets/libraries for complex UI controls and Responsible for JavaScript / AJAX UI upgrades and improvements.
- Experience with Angular 4 Directives, Dependency Injection, Services, Routing, pipes, Animations, Forms, AOT, Lazy Loading, RXJS

The START Center for Cancer Care, TX **Dec 2021 - May 2022**

Role: Junior Full Stack Developer

- Utilized Microsoft Azure for project management and version control, pushing code daily to make sure the team is always up to date with projects that are currently being worked on.
- Wrote C# code for simple back-end functionality such as authentication and encryption for sensitive patient data.
- Optimized applications by writing efficient TypeScript, creating arrays of objects that hold specific data to then be used in the DOM utilizing Angular directives for a more clean and effective code.
- Managed and created Restful APIs to be used in different projects, subscribing to them and then unsubscribing using Angular lifecycle hooks to avoid memory leaks.
- Utilized Angular services for storing API subscriptions for easy-to-access data that can be used anywhere in the application.
- Wrote technical documentation utilizing Visual Studio Code.
- Created databases for doctors and patients by creating simple JSON servers, utilizing MySQL for more structured data to then be queried into the application.
- Used Microsoft SharePoint for document management and file storage. Working with a marketer that provided SVGs and wire-framed documents to be used and translated into applications being worked on.
- Wrote clean and effective JavaScript code to make sure the user has a pleasant experience without any errors or crashes. Utilizing promises and observables, working with the library for asynchronous data manipulation.
- Optimized applications by creating dynamic components that hold specific information being called in by APIs using Angular's HTTP Client and services.

Tenet Health, TX **Jul 2020 – Nov 2021**

Role: Web UI Developer

- Created reactive and template-driven forms with validation utilizing Angular's form validators.
- Designed applications using front-end CSS frameworks like Bootstrap and Tailwind as well connecting CSS documents to the HTML.
- Redesigned the company’s entire website from scratch, focusing more on the front-end, utilizing HTML, CSS, and JavaScript with the Angular framework that includes TypeScript.
- Tested and rewrote JavaScript code to make sure functionality worked properly and is not using too much memory that will ultimately slow down production.
- Worked with development teams to ideate software solutions.
- Created clean and effective APIs to be used in projects.
- Built the front-end of other applications through appealing visual design utilizing the Angular framework with TypeScript and Bootstrap.
- Worked with back-end developers in peer collaboration.
- Troubleshot, debugged and fixed new and existing code.
