Objective

To work for a company that will provide new opportunities and career growth.

Summary Skills

- Proficient in the core fundamentals HTML5, CSS3 and JavaScript.
- Excellent knowledge in development: wireframing, documentation and standard coding practices.
- Creative engineering and software management: software development skills.
- Excellent in IT business consulting, sales, and communications.
- Successful in working in an AGILE based environment, participating in scrum sessions.
- Successful in implementing new technologies: AI integration.

Accomplishments

- Successful in the migration of software built in AngularJS to Angular 17+, increasing users and sales.
- Successful website rebuild for a cancer facility; tailoring to patients and medical professionals. (https://www.thestartcenter.com/)
- Designed and developed websites for local businesses, enhancing their online presence and accessibility. (client example: https://yourtimehomeinspections.com/)
- Increased client web traffic by an average of 30% through effective design and SEO optimization.
- Certification holder in AI tools and integrations.

Professional Experience

govWorks, LLC   **April 2023 - June 2024**
Front-End Developer | Remote

- Played a pivotal role in enhancing the functionality of the main CRM by developing critical components, addressing existing issues, and optimizing code for efficiency to increase sales revenue.
- Translated complex designs from Sketch into responsive front-end code, ensuring pixel-perfect implementation and visually appealing user interfaces.
- Demonstrated expertise in JavaScript, TypeScript, and Angular syntax, harnessing these technologies to implement dynamic features, seamless routing, and efficient API integrations within applications.
- Involved in the integration of AI resulting in improved performance and increased customer base.

Project Manager/IT Consultant   **June 2022 - Mar 2023**

- Developed and designed websites for local businesses providing online services to increase sales.
- Worked closely with clients to understand requirements and provided timely updates.
- Organized and led training sessions for clients on how to update and manage their websites, empowering them with the necessary skills and confidence.
- Utilized persuasive communication techniques to upsell additional services, increasing average project value by 15%.

The START Center for Cancer Care   **Dec 2021 - May 2022**
Full-Stack Developer | Hybrid, San Antonio, TX

- Utilized Microsoft Azure for project management and version control, making sure the team is always up to date with projects that are currently being worked on.
- Wrote technical documentation to improve future onboarding processes.
- Created databases for doctors and patients, utilizing SQL for a more structured approach to then be queried into applications.
- Worked with marketers that provided wire-framed documents to be translated into applications being worked on.
- Wrote clean and effective JavaScript code ensuring users have excellent experiences.
- Optimized applications by creating dynamic components that hold specific information being called in by APIs.
- Rebuilt and redesigned the company website increasing clientele and sales revenue.
